

The American College of Surgeons (ACS) *Operative Standards for Cancer Surgery (OSCS)*:

The Operative Standards for Cancer Surgery (OSCS) manuals contain evidence-based best practices for cancer surgeries based on expert consensus.

These standards define the critical aspects of the specific cancer operation known to improve oncologic outcomes. They are a robust source of relevant educational content for surgery residents and fellows to complement clinical training.

Provide a framework for cancer surgery

Rationale for intraoperative decision making

Preparation for ABSITE & Board Exams

Identify knowledge gaps for research

Improve surgical skills
