

large multi-year studies and accelerate the rebuilding of a research community that shrank in the decades before Congress restored this federal funding. Robust and sustained research on motor vehicle crashes and subsequent legislation has helped save hundreds of thousands of lives through public health interventions, including seat belts and other safety features. The same approach can help reduce gun violence in our communities, including ensuring that the CDC and NIH are able to adequately fund non-biased, evidence-based research into this public health priority.

Our organizations stand ready to work with you to support this critical effort. Thank you for your consideration.

Sincerely,

National Organizations:
